

New Laser Pointer Introduction:

New laser pointer has two buttons – yellow button turns on low-intensity guiding light and red button turns on high-intensity light to activate mouse click. The clear Teflon tip turns on the high-intensity light when it is pressed against the screen.

Two extension rods (12.25" each) are included to extend the reachable distance.

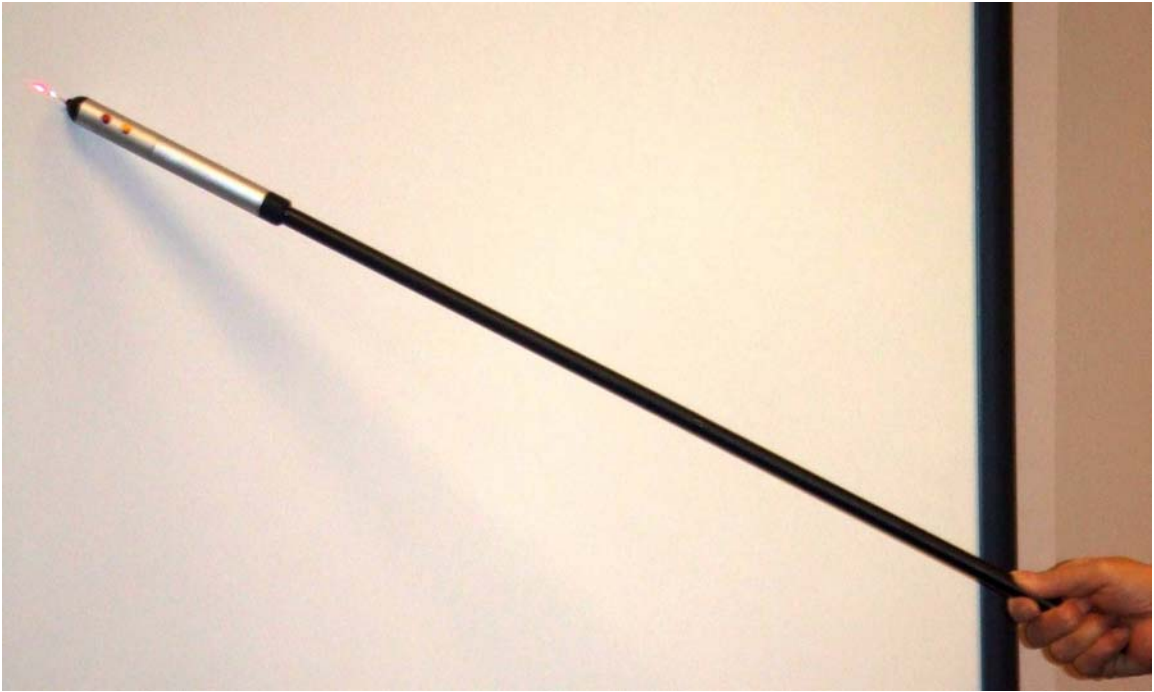

Operate from distance using the two buttons to guide and activate mouse click.

Press the tip to the screen to turn on the laser light to activate mouse to click and drag.

Use it with one extension rod.

Use it with 2 extension rods.
