*We can convert standard monitor, TV display, video wall, laptop PC, projection screen, whiteboard or whitewall into **Touch Interactive Device** – run any mouse-driven program on your computer.*

**OPTIR Touch** – based on the advanced solid state optical infrared technology which offers maximum clarity and superior durability. There are different models tailored to the requirements for different applications.

**32A** model - professionals top choice when a touch screen is called for their design project. This re-sizable touch screen is available as standard model to retrofit over **26" to 65"** flat panel displays or projection screens, and can be customized **up to 130"**.

The end users enjoy the convenience of easy mounting and setup. The designers, integrators and manufacturers love the flexibility and reliability of this innovative touch system.

**IRK** model – a modified version of 32A model so it can be used under direct sunlight without interference. The components used in IRK model cannot be re-sized to larger or smaller sizes. It is also available from **26" to 65"** and can be customized **up to 130"**.

Both 32A and IRK models are compatible with all Windows OS, Mac and Linux.

*KEYTEC is more than a product supplier, we are your solution provider.*

**PPMT** Model - **Plug-n-Play Multi Touch** Screen is a perfect solution for everyone. No driver installation, no calibration needed. Select the size that fits your monitor, plug into a USB port, then you can use your finger to run any mouse-driven program on Windows 7, 8 or Vista.

Standard models are available from **10.4" to 65"** and can be customized **up to 150"**. Integrated PPMT monitors are also available for both desktop and open frame models.

*KEYTEC welcomes resellers, distributors and strategic partners, apply on-line at <http://www.magictouch.com/resellerwanted.html>*

**HCMT** Model – **Hard Core Multi Touch** Screen is for those who love to touch with as many fingers as possible. With HCMT, four people can touch the screen with 10 fingers by each person simultaneously. Yes, HCMT model can support up to 40 touches at the same time. You may select the touch screen with **4, 6, 10, 16, 32, or 40 touches**. The touch screen sizes are available from **32" to 65"** as standard and can be customized **up to 103"**.

This model is typically shipped as disassembled segments for low freight cost. It is very easy to assemble and add a piece of glass or plastics as backing. Designed for Windows 7 and 8.

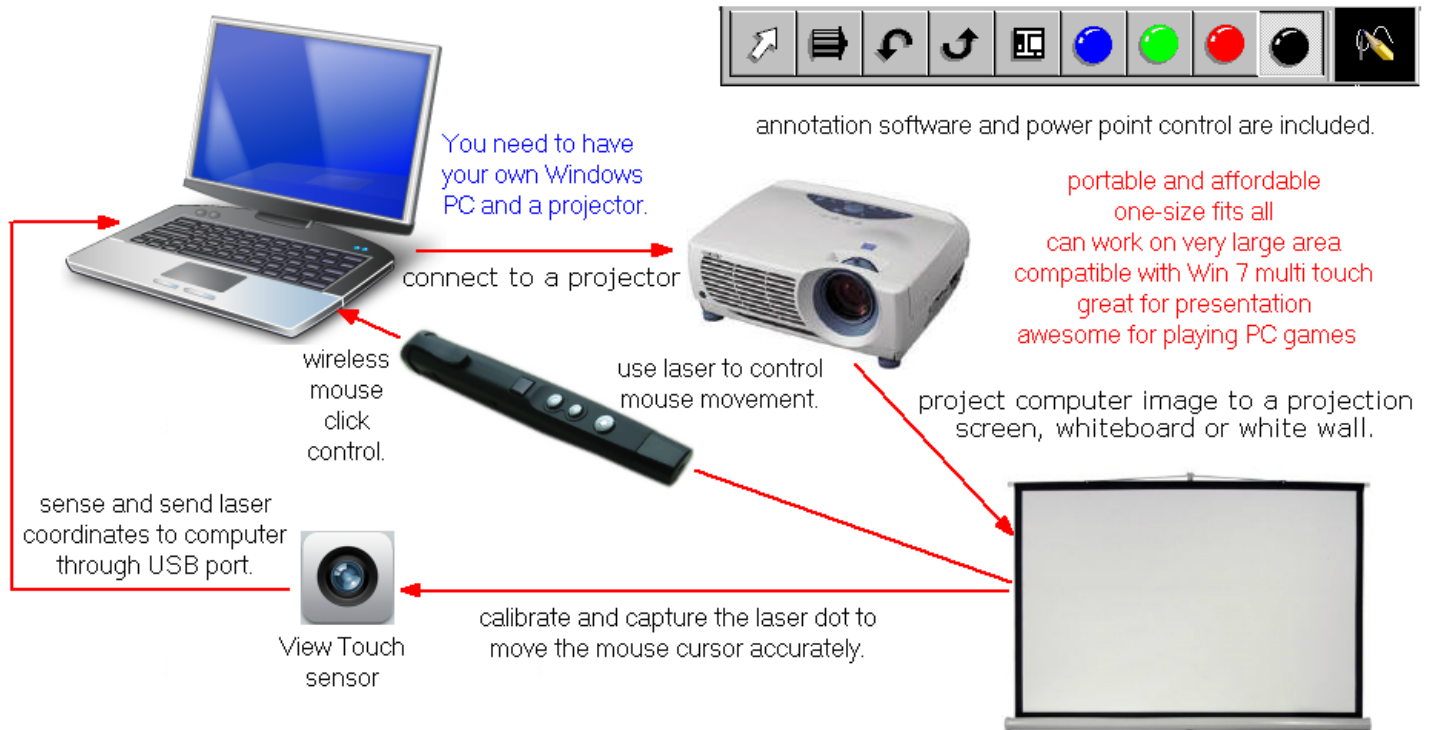

**Magic Touch** – This classic award winning product has established KEYTEC'S leadership in the touch screen industry. The original retrofit add-on touch screen is the icon of KEYTEC'S innovation and still going on strong after more than 20 years served in the market. Standard sizes are available from 12" to 24" for both desktop and laptop.

Magic Touch is also available as integrated touch monitor and built-in touch screen kits from 6.4" to 24". Compatible with all Windows OS, Mac and Linux.

*We can custom design the touch screens using all leading touch technologies - Infrared, capacitive, resistive, analog or matrix, hybrid with membrane switch or keypad, etc. Contact us today.*
